

Shaper is pleased to announce the release of the newest Autograph Collection – Loop Series products, on July 10th 2015. Circular and Radial forms are the theme of the Loop Series fixtures. The series consists of 2 circular pendants, 2 circular wall sconces and 3 arc sconces. The Loop Circular fixtures embody an angular white acrylic lens encased in a solid metal spinning. Behind the lens is a ring of LED sources providing indirect illumination on the lens. The resultant light effect is a stimulating glow that fades subtly toward the perimeter of the fixture. The Loop Arc Sconces are a family of three robust radial panels with concealed concentric lenses. The silhouette light effect shines outward from the center of the arc. A wide variety of finish options and LED color temperatures allows the designer to select a look that is right for many different applications.

A sample 14" Circular Sconce case will be sent to every US and Canada agent within the next 30 days. Included in the case is a set of metal color chips as well as a sample of the LED circuits that are used within Autograph Series products. Cut sheets and installation instructions are available on-line and photometric test results will be posted as soon as they are available. Ten (10) 4-page color sizzle sheets will be included with your sample and are available to download from the web site literature section. Additional products may be ordered as samples individually.

The price guide has been updated to include the Loop Series pricing and will be available for download from the agent-only web site on the 10th.

For additional information and training on all of the Autograph products, contact your Regional Architectural Sales Manager or Market Development Manager.
